

## Starlinger stands for

- \* teamwork with the customer
- \* hi-tech: best process and machinery technology – fine European workmanship
- \* hi-ROI: the operative advantages of technology fine-tuned for efficiency and productivity, combined with experience-based consulting for resource and cost optimization
- \* ongoing product development that opens up new markets for customers
- \* the number one on the market
- \* in more than 130 countries worldwide

Starlinger & Co. Gesellschaft m.b.H.  
A member of Starlinger Group

WORLD MARKET LEADER, A-Z TURNKEY  
SUPPLIER, STATE-OF-THE-ART TECHNO-  
LOGY, SERVICE & CONSULTING PARTNER,  
QUALITY LEADER

## Starlinger, the European technology force:

originator and patent holder, developer and producer of turnkey solutions from pellet to branded sack and back to recycled pellet

■ extrusion and winding ■ weaving ■ coating ■ printing ■ tubing ■ slitting  
■ conversion ■ baling ■ recycling

## Newest technology paves the way for product innovation:

starEX

\* **starEX extrusion technology:** highly productive machine for standard and high speed applications, suitable for producing all kinds of tape, economical, compact, highly efficient, modular design

omega 1000

\* **stacoFIL winding technology:** highest precision, flawless quality, central system control for yarn tension, low energy consumption

\* **circular weaving technology:** high speed circular loom, worldwide proven technology, outstanding fabric quality, high economic efficiency, versatile use

stacoTEC

\* **stacoTEC coating technology:** outstanding coating technology, inline lamination with printed PP film, coextrusion applications, versatile use, high economic efficiency

\* **dynaFLEX printing technology:** high speed printing, first-rate quality printing on fabric, fast and easy product change, high economic efficiency

dynaFLEX

\* **tubeTEC tubing technology:** tubing of coated woven fabric (single layer), extrusion sealing for back seam, compact and easy to handle, with or without gusset

\* **slitTEC slitting technology:** high speed slitting machine, amazingly simple adjustment, well thought out and operator-friendly

ad\*starKON

\* **ad\*starKON conversion technology:** high speed valve bottomer, worldwide patented hot air sealing technology, unrivalled efficiency, outstanding flexibility, exceptional durability

\* **multiKON conversion technology:** high speed fully automatic cutting and sewing line, fabric-saving operation, high economic efficiency, compact and easy-to-handle design, versatile use

multiKON

\* **baleTEC baling technology**

\* **recoSTAR universal recycling technology:** state-of-the-art recycling technology for the processing of films, staple fibres, non-wovens, mono- and multifilaments, tapes and fabrics, as well as solid lumps, start-up waste and big injection moulding parts, from materials such as PE, PP, PS and PA

AD\*STAR® is a registered trademark and is produced exclusively on Starlinger machines.
